Crew of Submarine Rescued After 2 Days

Aid Coms to U-Boat Helpless Under Waters of Atlantic Through Use of Small Buoy, Invention During World War—Commander is Last of Crew to Leave Ship.

(By Associated Press) PHILADELPHIA, Pa., Sept. 3.—Radio messages early today told of the rescue of the officers and crew of the submarine S-5 after they had spent nearly two days locked in the disabled vessel beneath the Atlantic ocean, 55 miles south of Cape Hatteras. The message of the submarine's plight came by means of a small buoy, a development of the world war, which was released by the submarine and seen by the lookout aboard the army transport General Goethals. In response to messages from the Goethals, the steamer Albatross came up, and together the vessels were able to attach grappling hooks to the submarine's stern. Destroyers were rushed from Philadelphia, Newport News and New York, but before they arrived the Goethals and Albatross had completed the rescue. Lieutenant-Commander C. M. Cooke was the last person to leave the submarine.

LEAGUE THEME OF COX'S TALK

Governor Continues Unproved Attacks on Republican Campaign Funds

LANSING, Mich., Sept. 3.—Corruption in politics and the league of nations were the main themes of Governor Cox in opening in Michigan today his long western trip. Attacks on Republican contributions were linked by the governor in a stirring address with the Newberry case. "I come to demand that these United States shall be saved from Newberry of Michigan multiplied 48 times," Cox said. Charges of a "plot to buy the presidency" were made by the Democratic nominee. In advocating the league, Governor Cox criticized Senator Harding's recent league speech. Referring to the Hague tribunal as an institution with "bats in its belly and spiderwebs everywhere," the governor asserted that it had been proved a failure, and that Harding's position was simply "reactionaryism applied to international affairs."

TAXES ON MINES ARE DISCUSSED

Operators Appear Before Board of Equalization and Talk Over Litigation

A meeting of the state tax commission was held in the senate chamber during the week to give the mining men their requested hearing in an effort to straighten out differences and bring to an end litigation which has already been instituted in Nevada. John G. Kirchen, president, and Henry Rives, secretary, respectively, of the Mine Operators' association, and their attorney, George R. Thatcher, appeared before the commission and made their proposition. Although some of the parties interested profess to believe that the mining men and the commission are really not far apart and that a settlement can be effected without pressing lawsuits to final judgment, no agreement was reached. The matter will be discussed further by the members and the assessors, who were present at yesterday's meeting. Attorney General Fowler was also present as one of the representatives of the state.

The main bone of contention appears to be regarding the various items that the mining men wish to include in the taxation exempt term, "construction costs." The mining men wish to induce the tax commission to permit amortization of the mining plants charged to operating expense at the rate of 20 per cent for a period of four years, which they would claim as further reduction from payments of taxes on the remaining 20 per cent of the cost of the plant.

JUDGE RENDERS LABOR DECISION

Denies Injunction to Prevent Dismissal of Employees For Union Activity

(By Associated Press) WASHINGTON, D. C., Sept. 3.—Application for an injunction to prevent the discharge by the Old Dominion Railway company of certain employees because of union affiliations, was denied today by Justice Siddons of the District of Columbia supreme court. While not passing on the validity of the transportation act, the opinion stated that if legislation "undertakes to restrain the power of employers to discharge their employees for joining a labor union, the act would then appear to come within the denunciation of such legislation by opinion of the supreme court." Right to labor was an individual right which carried with it the right not to work, Siddons held, adding that the supreme court of the United States had upheld the right of an employer to impose conditions on those seeking employment.

JAP QUESTION IS DISCUSSED

Governor of California Sure no Immigration Agreement Has Been Signed

(By Associated Press) WASHINGTON, D. C., Sept. 3.—Governor Stephens, of California, was in conference today with Secretary of State Colby at the state department regarding the Japanese situation in California. While he would not say what had transpired during the discussion, the governor indicated later that he had been assured that reports from Tokyo of an approaching agreement between Japan and the United States providing for the naturalization of Japanese now in this country were without foundation. A referendum election on the proposed law directed at the Japanese problem must be carried out, whatever agreement the two governments may conclude, the governor said. Before the conference with Stephens, Secretary Colby went to the White House to confer with President Wilson. No intimation of the reason for the White House conference was given. Secretary Colby said later that his talk with Governor Stephens had been illuminating. He said that he had found the California executive to realize fully the seriousness of the problem and to be anxious to do justice in solving it.

These charges were made by a committee which Johnson headed. Teifer denied all these charges.

HOUSE SHORTAGE MET IN ENGLAND

Government Plans on Complete Rebuilding Within Next Three Years

(By Associated Press) NEW YORK, Sept. 3.—The acute housing shortage faced by many cities in the United States today brought from the Guaranty Trust company a description by its foreign trade bureau of how Great Britain was meeting a similar situation. "The program of the British ministry of health complete rehousing in three years—is about one year behind and is costing more than double the original estimates," said the report. "Local authorities in England are left in charge of the work unless their fail to show results, in which case the business is turned over to the office of works." "What is keeping back housing at the present time is the fact that there are not enough skilled men to do even a quarter of the work wanted. The trade unions will not allow the number to be increased from the outside."

MUCH PAPER CAN BE MADE IN ALASKA

(Correspondence of Associated Press) JUNEAU, Alaska, Aug. 20.—Wood for making 2,000,000 tons of paper annually—about one-half the present consumption of the United States—can be furnished by Alaska's forests without depleting them, Colonel W. B. Greely, Washington, D. C., chief of the United States forest service, said while here recently. Twenty or more pulp mills could be operated year after year in Alaska, forest service officials estimate. The growing new timber would be sufficient to replace that cut in the mills. Colonel Greely, accompanied by G. H. Coed, of Portland, Oregon, district forester for the Northern Pacific district, and other forest service men, spent several days here looking over the highway and timber situation.
